Colour *System*

The palette is grounded in the agricultural heritage of Kwara State — deep forest greens representing land and livestock, harvest gold representing productivity and prosperity.

BACKGROUND	PRIMARY GOLD	GREEN DEEP	GREEN BRIGHT	CARD BG
Deep Savanna #0a0f0d Primary background	Harvest Gold #c49a3e Brand accent · CTAs · Highlights	Forest Green #1a5c26 Headings · Section accents	Meadow Green #2e9e50 Success states · Active badges	Dark Card #161e18 Card surfaces · Admin panels

Supporting Colours

 Sky Blue #0891b2	 Violet #7c3aed	 Alert Red #dc2626	 Amber #d97706	 Rose #ec4899
 Surface Light #f9fafb	 Text Muted #6b7280	 Text Primary #111827		

Contrast & Opacity Levels

92% White Body text	55% White Descriptions	35% White Metadata	Gold Labels & CTAs
-------------------------------	----------------------------------	------------------------------	------------------------------

Type *Scale*

Two typefaces: **Playfair Display** (serif) for editorial headlines — adding authority and elegance — and **Inter** (sans-serif) for all functional text — clean, highly legible, and optimised for screens.

 Rich Text Editor

TipTap WYSIWYG editor for news articles. Supports bold, italic, lists, headings, and image embeds.

 Multi-Image Gallery

Upload multiple photos per project. Remove individual images from the gallery without affecting others.

 JWT Authentication

Secure 24-hour sessions.
Auto-logout on token expiry.
Password hashed with bcrypt.

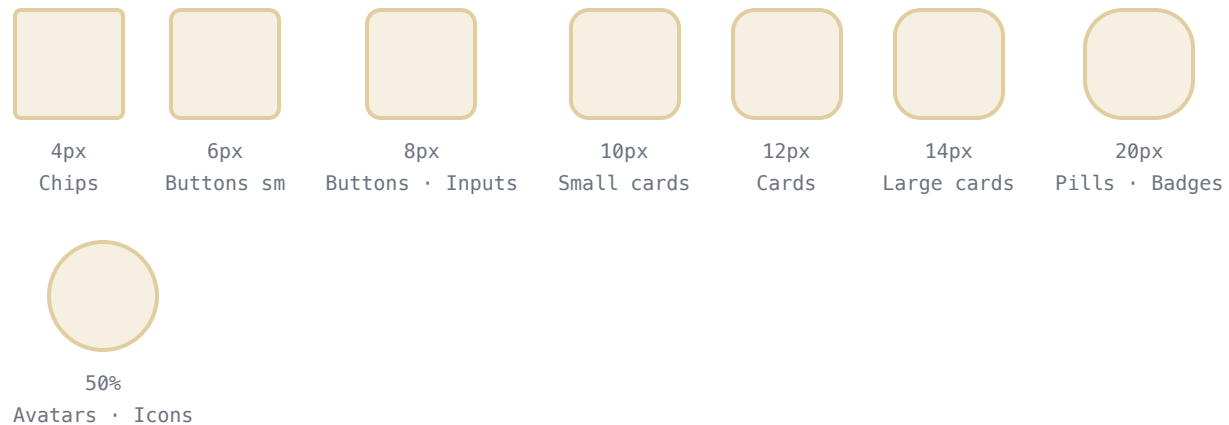

Spacing, Radius & Shadows

Consistent spatial rhythm and depth create visual hierarchy. All spacing follows a 4px base unit. Border radii are consistent across component families.

Animation *Principles*

Motion is purposeful and minimal. All animations serve to guide attention, confirm interactions, or reveal content progressively. No decorative animation exists solely for aesthetics.

Scroll Reveal — Slide Up

```
cubic-bezier(0.22, 1, 0.36, 1) · 0.6s
```

Used on: section headers, cards, content blocks.
Triggered once when element enters viewport.

Hero Entrance — Fade Up

```
cubic-bezier(0.22, 1, 0.36, 1) · 0.55–0.65s
```

Used on: badge → title → subtitle → CTAs. Staggered by 0.12s each using animation-delay.

Stagger Delay System

```
data-delay="1" → +0.08s per step
```

Apply data-delay="1" through "6" to sibling elements for cascading reveals without JavaScript delay logic.

Background Slowzoom

```
ease-in-out alternate · 22s infinite
```

Hero background image gently scales 100% → 108% over 22 seconds. Creates depth without distraction.

Interaction Transitions

Hover: Cards

```
transform:
  translateY(-2px)
transition: 0.2s ease
```

Subtle lift + border highlight on card hover

Hover: Buttons

```
opacity: 0.88
transition: 0.15s ease
```

Slight opacity dim. No scale or colour shift.

Reduced Motion

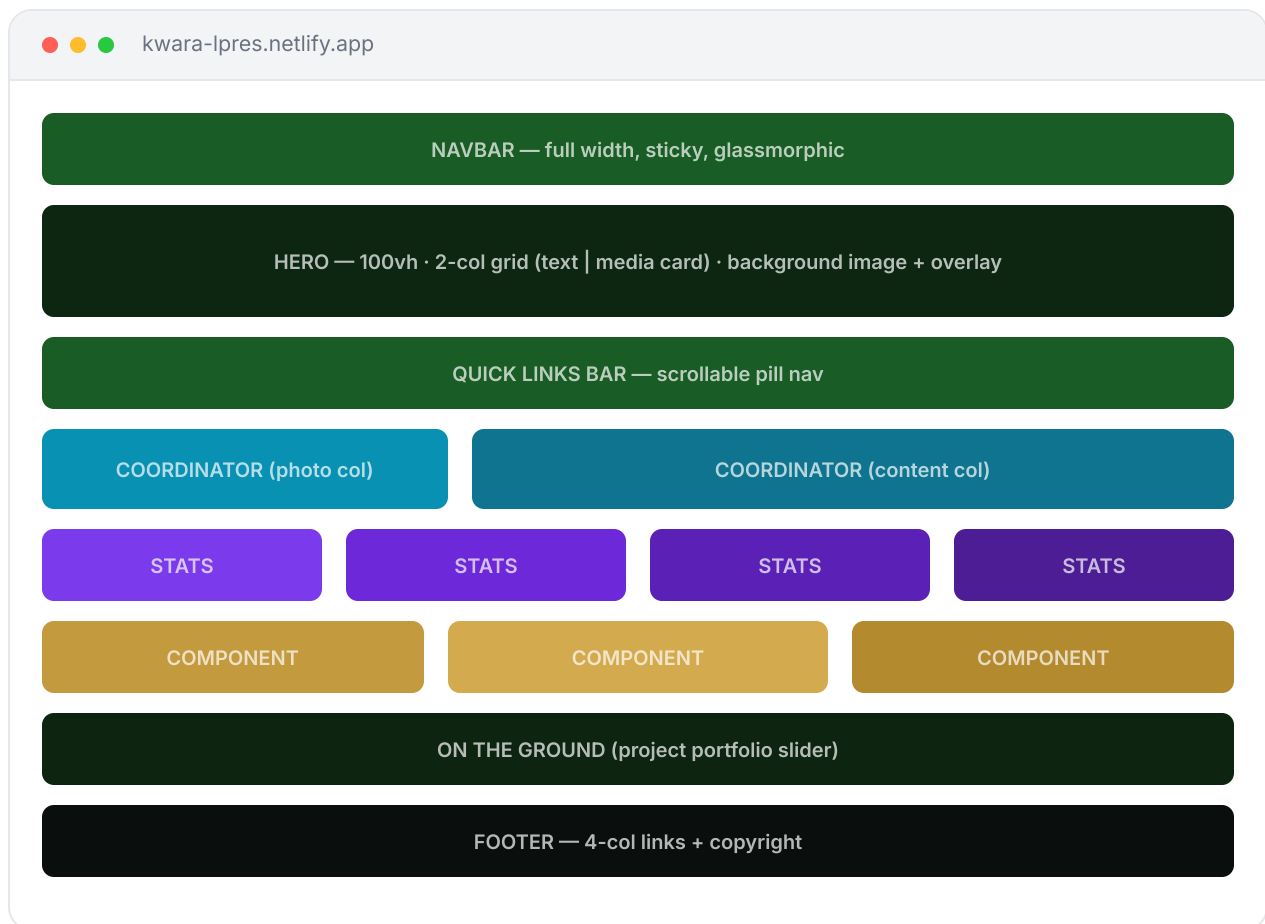

```
prefers-reduced-motion:
  animation: none
```

All animations and transitions disabled for users who request it via OS settings.

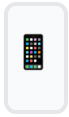

Grid *& Breakpoints*

CSS Grid with `auto-fill` and `minmax()` provides fully automatic responsiveness — no manual breakpoint overrides needed for most grids. The layout uses a fluid container with 24px gutters on mobile scaling to 48px on desktop.

Layout Anatomy

What Was *Delivered*

A fully designed, built, and deployed website — not a mockup. Every component shown in this document is live and functional at the URL below.

Public Website

- ✓ Full homepage with 12 sections
- ✓ News listing + article templates
- ✓ Filterable media gallery
- ✓ Project portfolio with image carousel
- ✓ Interactive Leaflet field survey map
- ✓ YouTube documentary embed
- ✓ Contact section
- ✓ Partners & publications sections

Admin CMS

- ✓ Secure JWT login system
- ✓ Rich text news editor (TipTap)
- ✓ Multi-image project gallery manager
- ✓ Photo + video gallery uploader
- ✓ Publish / unpublish toggle
- ✓ Dashboard with content stats
- ✓ Automatic slug generation
- ✓ File size + type validation

Backend API

- ✓ FastAPI REST API (28 endpoints)
- ✓ SQLite database with migrations
- ✓ File upload with UUID naming
- ✓ Seeded with sample data
- ✓ Interactive Swagger docs
- ✓ Health check endpoint

Deployment

- ✓ Live on Netlify CDN (HTTPS)
- ✓ Serverless Functions for preview
- ✓ One-command deploy pipeline
- ✓ Technical documentation PDF
- ✓ UI/UX design deliverable (this doc)
